📁 EMPLOYMENT HISTORY

IT Project Manager at PT Extramarks Education Indonesia, South Jakarta

October 2022 — Present

- Accomplishments include the successful completion of the Revamp Web Corporate project and the Revamp Online Learning Platform project “Kelas Pintar”. These endeavors encompassed a web-based platform (kelas-pintar.id), iOS v5.0.0 (apps.apple.com/id/app/kelas-pintar/id1469195409), Android v5.0.0 (play.google.com/store/apps/details?id=id.extramarks.learningapp&hl=id) were launched on August 6, 2023.
- Furthermore, I effectively led a diverse team of numerous developers, encompassing UI/UX, mobile developers, web developers, backend developers, DevOps, and quality assurance professionals, ensuring their cohesive collaboration and excellence throughout the project's lifecycle.

Project Manager at ICT Help, Depok

February 2022 — October 2022

Accomplishing a significant milestone, I successfully led a project as a vendor in the creation of a Job portal (<https://www.aseanjobs.org/>) commissioned by our client, the ASEAN Foundation, as part of a collaborative with Google.org and Plan International.

Project Manager at Jakarta Smart City, Central Jakarta

February 2021 — January 2022

- I have achieved notable milestones in collaborating with the Jakarta Provincial Government, especially in the area of public health. I was the driving force behind the creation of the vaccination registration system (<https://vaksinasi-corona.jakarta.go.id>), which made it possible to effectively disseminate vaccination schedules and availability to residents of DKI Jakarta.
- My accomplishments also restructuring business procedures. I was able to engineer the development of the Human Resources Information System, fittingly titled Smart Employee (<https://employee.jakartasmartcity.id/#/>), which has substantially streamlined and improved internal operations. I did this by doing thorough analysis and strategic designs.
- I'm proud of my collaboration with the Department of Civil Registration and Vital Statistics (DUKCAPIL) as well as my other accomplishments. This was clearly demonstrated by the way I oversaw the creation of the JAKI Apps for Digital ID Product (<https://jaki.jakarta.go.id/id/>).

System Developer at PT Persada Nusantara Telekomunikasi, Central Jakarta

September 2016 — January 2021

- I achieved the distinction of being the top employee in July 2020, a testament to my success in pioneering the development of an internal ERP system named SIMFONI (<https://simfoni.ofon.co.id>). This achievement stems from my role in orchestrating the seamless transition of our company's business processes from manual to automated, thereby significantly reducing paper usage and advancing our operational efficiency.

- In addition, I have also achieved the successful establishment of Point of Interconnection for telecommunication networks, facilitating seamless interconnection with PT TELKOM across several major cities.
 - 2016 : Jakarta, Bogor, Serang, Batam, and Tanjung Pinang.
 - 2017 : Medan, Pekanbaru, Palembang, Bandung, Cirebon, and Semarang.
 - 2018 : Surabaya, Denpasar, Yogyakarta, Solo, and Makassar.

Network Engineer at PT Batam Bintan Telekomunikasi, Batam

September 2015 — August 2016

- My achievements as a Network Engineer include pivotal contributions to a significant Billing System transition from PSTN to VoIP. Notably, I spearheaded Switching and Routing efforts for seamless interconnections with Telco Providers. I also took charge of configuring SIP Servers, VoIP Clients, and operational IP Multimedia Subsystems for Softswitch or IP PBX functionalities.
- Furthermore, I showcased my expertise in diagnostics and preventative maintenance, effectively addressing and mitigating information technology-related issues.
