EXPERIENCE

Solutions Architect - PT Extramarks Education Indonesia, Jakarta Selatan

October 2022 — August 2023

- Successfully completed the Corporate Web Revamp project and the “Kelas Pintar” Revamp Online Learning Platform project which was released on August 6 2023. This effort includes a web-based platform (bisnispintar.id), iOS v5.0.0 (apps.apple.com/id/app/smart-class/id1469195409), Android v5.0.0 (play.google.com/store/apps/details?id=id.extramarks.learningapp&hl=id).
- The Revamp project was an extraordinary experience because I was trusted to lead a diverse team consisting of many developers, 10 Mobile Developers, 10 Front End Web Developers, 4 Fullstack Developers, 6 Backend Developers, 2 DevOps people, and close coordination with Product Owner, UI/UX team, QA team and Vendor to ensure product quality throughout the life cycle.

System Analyst - PT Persada Nusantara Telekomunikasi, Jakarta Pusat

September 2016 — September 2022

- Achieved the title of best employee in July 2020, due to success in pioneering the development of an internal ERP system called SIMFONI (<https://simfoni.ofon.co.id>) as an Analyst and dual role as part of Fullstack Developer. This system significantly reduces paper usage and simplifies business processes in the company.
- Collaborated with ICT Help to complete a project to create a job search portal called Asean Jobs (<https://www.aseanjobs.org/>) from a client called the ASEAN Foundation which also collaborated with Google.org and PLAN International. In this project, apart from coordinating with the UI/UX Team and Fullstack Developer, they are also tasked with carrying out Manual Quality Assurance and creating a Guide Book.
- Collaborating with Jakarta Smart City in the vaccination registration project (<https://vaksinasi-corona.jakarta.go.id>), as a portal for socializing schedules, vaccination quotas and registration that DKI Jakarta residents can use to register for Covid-19 vaccination. Update daily vaccine quotas, provide technical guidance for all Health Facilities and actively coordinate with the Peduli Protect team.
- The next achievement is restructuring business procedures through the development of a Human Resources Information System, named Smart Employee (<https://employee.jakartasmartcity.id/#/>), which has substantially simplified and improved internal operations in Jakarta Smart City for absenteeism, activity reporting and other features.
- Successfully built operator infrastructure which is usually called Pol (Point of Interconnection) which connects one telephone operator to another operator which is bridged by PT TELKOM. The technical activities carried out include designing, installing and configuring telecommunications equipment, preparing telephone billing systems, conducting test calls, and non-technical activities such as coordinating with KOMINFO, operator partners and vendors. Pol locations that have been successfully built include :
 - 2016 : Jakarta, Bogor, Serang, Batam, and Tanjung Pinang.
 - 2017 : Medan, Pekanbaru, Palembang, Bandung, Cirebon, and Semarang.
 - 2018 : Surabaya, Denpasar, Yogyakarta, Solo, and Makassar.

Network Engineer - PT Batam Bintan Telekomunikasi, Batam

September 2015 — August 2016

- The role as a Network Engineer includes important contributions to the transition of Telephone Systems from PSTN to VoIP (Voice over IP). Configure Switching and Routing for interconnection with Telecommunication Operators. Configuring SIP Server, VoIP clients, and IMS (IP Multimedia Subsystem) or devices that function as Softswitches or IP PBX on a large scale.
- Configuring the network device monitoring system using Cacti and Telegram. Perform device troubleshooting and maintenance.
